

# MERGENT

## BRAKE PADS

# HEAVY DUTY

## Mergent Metallic

Made from special compounds developed by FMP Group, the NEW Mergent Metallic disc brake pads are manufactured to deliver first-rate performance for all heavy duty applications. Extensive research and testing have been conducted to ensure their reliability under all weather and road conditions.

## Advanced Formulation

### Features

- **Unique Insulation Layer**  
*Benefits : Cooler braking & longer rotor life with less warping.*
- **Semi-Metallic Technology**  
*Benefits : Reliable under all weather conditions.*
- **Less Dust**  
*Benefits : Keep wheel trims and rims clean.*
- **Heavy Duty**  
*Benefits : Longer pad life under extreme conditions.*
- **Fade Resistance**  
*Benefits : The hotter it gets the better it performs.*
- **Exceeds BS AU 142 [UK] and SAE J661A [USA]**  
*Benefits : Improved all round performance.*

## Technical Specification

### Metallic

#### Multi-purpose brake pads for:

- Working vehicles.
- Heavy city traffic driving.
- Winding and steep roads.
- Active and frequent braking under heavy loads.

- Long-lasting semi-metallic material with unique insulation layer.
- Performs extremely well at high temperatures.
